Presenting information about cutting-edge science in cardiovascular research

The Vienna Working Heart Research Group is a lab focusing in cardiovascular research located in Vienna, Austria. Founded in 1991 by Bruno Podesser, our major research topics include:

- Innovative therapeutic strategies in ischaemic heart failure
- Optimizing cardiac ischaemia/reperfusion strategies
- Gender differences in heart failure

You are invited to check out our publication list, learn about our Team and how it all began. Or get an idea of the experimental models we use in our lab. If you have any further questions, do not hesitate to write us an email.
